Release Plan

Product/Team Name: SlugFind
Release Date: 4 June, 2024

High-Level Goals: Have a functioning map app for the campus of UC Santa Cruz that lets students place markers pinpointing the exact locations of classrooms to help others find their classes easier.

User Stories:

Sprint 1(week 2 - week 3):
- As a user, I want to be able to zoom in on the map to see the name of specific buildings on campus. [2]
- As a user, I want to be able to zoom out from the map to see the whole campus layout. [2]
- As a user, I want a search bar that's easy to find. It should let me type in the name of my destination right next to the map. [5]

Sprint 2(week 4 - week 5):
- As a user, I want to be able to type the name of the classroom and have the app locate it. [8]
- As a user, I would like to have the option to set up my account within the application. [5]
- As a user, I want to be able to mark a desired location on the map. [8]

Sprint 3(week 6 - week 7):
- As a user, I want to be able to see the markers placed by other users. [8]
- As a user, I expect the markers placed by other users to be accurate and reliable. [5]

Sprint 4(week 8 - week 9):
- As a user, I want to be able to click on a classroom and see what times is it likely to be occupied [8]
- As a user, I want to be able to click on a classroom and see what classes are being held in it this quarter, as well as what times they are being held [8]
