Sprint 3 (week 6 - week 7):
- **Scrum Master**: Christian
- **Tasks**:
- Storing the markers in the database
- Allowing users to delete their own marker
- Allowing users to add multiple markers
- Display the markers in the app from the database
- Switch button to show local markers vs global markers (Ideal)
- Polishing everything
- List of classes for classrooms
- Edge cases for markers in any case
- Refreshing map and markers everytime we modify the database - will fix issue
- Search bar only selects UCSC locations
- Autofill search bar (for markers)
- **Roles:**
  - **Jason: PO**
  - **Tim: Dev**
  - **Hasan: Dev**
  - **Christian: SM**
  - **Caden: Dev**
- **Initial task assignments::**
  - Jason:
    - Linking the search bar with marker labels.
    - Implementing autocomplete for search bar
  - Timothy:
    - polishing markers and try to work on refreshes
    - List of classes for classrooms
    - Helping switch button from local and global markers
  - Hasan:
    - Switch that swaps between local and global markers.
  - Caden:
    - Storing the markers in the database
    - Allowing users to delete their own marker
    - Allowing users to add multiple markers
    - Display the markers in the app from the database
    - Polish marker interaction with database.
  - Christian:
    - limit search to ucsc
    - markers search
- **Overall Time Estimate: 20 Hours**

Current Scrum board:

To Do	In Progress	Done
		Store markers in DB
		Allow users to delete own markers
		Display markers in app from the DB
		Add Multiple Markers
		Limit Search to UCSC
		Search for Markers
		Refresh Markers
		Dark Mode UI for Map
		Report on Markers
		Add autofill search for markers
		Colors for local vs global marker
	Polish application	

- **Schedule of Scrum meetings**
  - **M F at 2:30, through zoom**

- **Sprint 4 Tasks Temporary**
  - **Add markers on campus**
  - **Polish application**

- Fix small bugs
- Change slug pictures to PNGs
