- **Project repository**: GitHub
- **Communication channel**: Discord

Development environment
- **IDE**: VS Code
- **Tools**: Flutter SDK, Xcode, and Android Studio
- **Languages**: Dart

Style Guide
- Unique and meaningful functions/variables names - start with lowercase and every word after is uppercase.
- No super long lines.
- Code contains no duplication.
- Visual separation of code blocks.
- Every helper function is intended to do only one thing, suggested by its name.
- Concise comments.
